**Corporate Legal and Compliance Leaders
Cybersecurity Survey 2018**

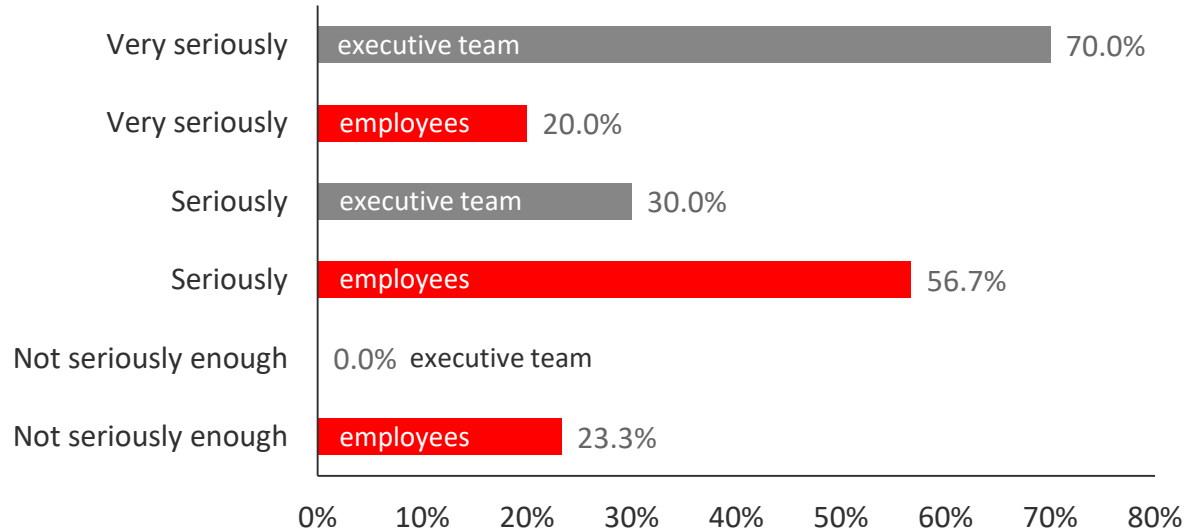

Q2: Which of the following most closely matches your job? Check one

Q3: How seriously does your executive team take Cybersecurity?

Q4: How seriously does your general employee base take Cybersecurity?

Q5: Does your company have a comprehensive and updated incident response plan?

Comments:

- But it is under preparation
- It is a young company and it is one of the issues that needs to be dealt with.
- I am sure there is, but aside from basic training to staff we are not aware of what this is.

Q6: What are the two biggest challenges you face regarding notices in the event of a breach? Check two.

Q8: Complete the sentence: Dealing with data protection authorities in various jurisdictions is best handled by...

Other:

- Legal works with HR and IT
- although some external counsel role can be played in the event of significant breach
- the Compliance in-charge
- No experience of dealing with data protection authorities, but the company would expect in house Legal function to deal with it, with external advice as needed
- Compliance function
- ... and data protection professionals
- Both!
- depending on the issue either / or (no voting button for "Other")

Q9: What level of comfort do you have with security of company or personal data stored in the "cloud"?

Comments:

- Especially if the cloud is very secured and has a good track record/status/rating
- Lack of ability to get behind the marketing spin the understand whether the risks lie and concern that own IT Dept will not see the risks, exclusion of liability by providers in T&Cs
- Public cloud-hosted applications are inherently insecure
- More secure than if on a laptop etc.

Q10: What Cybersecurity standard does your organization aim to achieve? Check one

Q11: Is your organization's budget for cybersecurity resources and budget aligned with your cybersecurity standards?

Comments:

- Cyber budgets are never enough in any organization at this moment in time.
- Don't know / not sure
- Forever under resourced, but that is a fact of life.

Q12: In addition to education and training, do you "monitor" employees (to catch mistakes and/or intentional bad acts)?

Comments:

- Generally yes but it is not allowed in some countries without informing, therefore employees are informed of monitoring, but in others it is allowed.
- We run regular tests
- Cannot answer / no comment
- Not continuously, and only within the limits permitted by applicable laws
- No, there is lack of bandwidth, my company adopts the reactive posture
